CFAINT06

Produce sight translations within interpreting assignments

**Overview**

This standard is for interpreters who produce sight translations of written/video texts from the source language into the target language as part of interpreting assignments. The interpreter may be required to do this within the context of an interpreting assignment, when there is a text, the content of which needs to be translated at sight. This involves being able to assess whether a sight translation can be undertaken within a reasonable time during the interpreting assignment and producing a sight translation of the text, conveying its meaning accurately and fluently. Text can include correspondence, personal status certificates, information leaflets, administrative forms, video clips and text messages.
